

Document: MEPs want to increase corporate fleet targets

送信者: POLITICO Pro Mobility 受信日時: 2026-09-29 23:25

【要点】

- ・ 欧州議会の交渉担当者が企業車両規制の電動化目標を引き上げる3つの妥協修正案を提出し、大規模加盟国の目標を2035年までに95%から99%に引き上げることを提案している。
- ・ 修正案では、プラグインハイブリッドなどの低排出車ではなく、完全電動車のみを目標達成にカウントすることを求めている。
- ・ 企業車両の短い利用期間により中古市場への供給を増やし、より手頃な価格の電動車を一般消費者向けに提供することを目的としている。
- ・ この規制は2025年12月に委員会が提出した自動車パッケージの一部であり、自動車メーカーの排出基準の弱体化とのバランスを取るためのものである。
- ・ 強制的な目標はEU加盟国から不人気であり、ポーランド主導の9カ国の連合が反対を表明しており、ドイツも反対するため理事会で阻止少数派を形成している。

Document: MEPs want to increase corporate fleet targets

By Jordyn Dahl · Sep 29, 2026, 4:25 PM · [View in your browser](#)

The lead negotiators for the European Parliament on the corporate fleet regulation have tabled three compromise amendments that would increase electrification targets for member states, according to the documents obtained by POLITICO .

The amendments raise the minimum target for larger member countries like Austria and Germany from having 95% of their corporate fleets electrified by 2035 to 99% of the fleets.

The rapporteurs also want only all-electric vehicles to count toward the target, rather than a combination of zero-emission and low-emission cars like plug-in hybrids.

Tiemo Wölken and François Kalfon of the Socialists and Democrats are jointly leading the file across the ENVI and TRAN committees, making clear in their draft proposal from May that they would propose higher targets than the European Commission suggested.

The policymakers are focused on creating more affordable electric vehicles for the second-hand market, viewing the corporate fleets regulation as one mechanism to create more supply.

The shorter leasing periods of corporate fleets “make them reach the second-hand market faster and in greater volumes than privately owned vehicles,” the two MEPs write in the amendments. “Realising this potential requires public policies that actively support the uptake of second-hand zero-emission vehicles

on the market.”

The corporate fleets regulation is part of the broader automotive package put forward by the Commission in December 2025. The binding targets for member countries is meant to act as a counterbalance to the weakening of emission standards for automakers.

But the binding targets are unpopular with EU capitals. A coalition of nine countries led by Poland have publicly come out against the mandatory targets. Germany is also against the regulation, which creates a blocking minority in the Council.
