

EU countries drop mandatory industrial acceleration areas from IAA

送信者: POLITICO Pro Alert 受信日時: 2026-08-01 02:12

【要点】

- ・ EU加盟国は産業加速区域の指定が任意となり、強制的な指定要件が削除された。
- ・ 第三国製品のEU原産品同等扱いについて、「パートナー原産地」という法的カテゴリーを導入し、既存の調達・自由貿易協定に基づいた条件を設定した。
- ・ 許認可手続きが単一手続きから各国の権限に基づくデジタル単一アクセスポイント方式に変更され、加盟国の柔軟性が強化された。
- ・ 鋼鉄原産地の判定基準を「溶解・鋳造された国」と明確化し、自動車産業では85%以上のEU原産品基準達成時の自己申告制度を導入した。

EU countries drop mandatory industrial acceleration areas from IAA

By Francesca Micheletti · Jul 31, 2026, 7:11 PM · [View in your browser](#)

BRUSSELS — EU countries would no longer be required to designate industrial acceleration areas under the Industrial Accelerator Act, according to a second compromise text circulated by the Irish presidency of the Council.

“Member States may designate industrial manufacturing acceleration areas on their territory to cluster industrial manufacturing projects,” says the text seen by POLITICO, which was dated July 30. Under the Commission’s March proposal, each member country would have been required to designate an acceleration area within 12 months.

The text introduces the legal category of “partner origin” to determine which products from third countries can be treated as equivalent to EU origin. It sets out detailed conditions based on existing procurement and free trade agreements.

The Commission would adopt implementing acts — rather than delegated acts — establishing and maintaining lists of partner countries. That would give national governments a formal role in approving those decisions.

The text also revises the foreign investment chapter, allowing the Commission to intervene only at the request of national investment authorities, rather than opening reviews on its own initiative.

It also gives EU countries more flexibility on permitting by replacing the Commission’s proposal for a single permitting procedure with a system centred on a digital single access point and a coordinating

authority, leaving permitting decisions with national authorities.

Key sectoral changes concern steel and automotive. The compromise specifies that the origin of steel is determined by the country where it is melted and poured, in line with the proposed EU measure on global steel overcapacity.

The compromise also retains a flexibility mechanism for automotive origin requirements, allowing manufacturers to rely on a self-declaration where at least 85 percent of the relevant vehicles they assembled the previous year complied with the EU-origin rules.
