Brussels will aim to industrialize AI through 2027

送信者: EG Geo-technology 受信日時: 2026-10-20 03:04

【要点】

・EUは米国と中国のAI開発に後れを取っているため、産業用AIの育成にシフトしており、規制よりも競争力と主権を優先している。

・EUは産業政策、競争政策、データ政策を活用してAI産業を支援し、企業のAI採用を促進し、米国への依存を軽減することを目指している。

・EU AI法は今後2年間段階的に施行されるが、加盟国間の実装が断片的であるため、運用が複雑化する可能性がある。

・EUは自動車、医療、防衛などの既存の強み分野に注力することで、世界のAI経済における収益性の高いニッチを確保できると考えている。

・欧州委員会は産業用AI特別使節から年末までに産業用AI採用促進に関する報告書が発表され、同時にデジタルサービス法などの既存規制がクラウドとAIサービスに適用される予定である。

Brussels will aim to industrialize AI through 2027

19 Oct 2026 14:01 EDT Discover more on the Portal

*
Brussels is trying to pivot from primarily regulating AI to industrializing it, prioritizing competitiveness and sovereignty over new rulemaking.
*
Brussels will deploy industrial, competition and data policy to support the EU's AI sector, boost business adoption and reduce the bloc's dependence on the US, while also expanding the scope of existing regulations to cover AI and cloud services.
*
The EU AI Act will continue to enter into force in stages over the next two years, but fragmented enforcement across EU member states, some of which have passed additional AI laws, is likely to complicate implementation.

Having struggled to keep pace with US and Chinese frontier model developers, the EU is pinning its hopes on industrial AI. The bloc is being squeezed on two fronts: US controls on frontier models such as Anthropic's Mythos have highlighted its strategic dependence on Washington, while Chinese advances in physical AI and robotics threaten to exacerbate the competitive pressures already facing European manufacturers. At the same time, EU governments must complete implementation of the AI Act and

face pressure to further regulate to address other AI risks and harms—despite the bloc's deregulation and competitiveness push.

Brussels believes that by doubling down on Europe's existing strengths in sectors such as automotive, healthcare and defense, the bloc can carve out profitable niches in the global AI economy. To this end, European Commission President Ursula von der Leyen's special envoy for industrial AI, Jim Hagemann Snabe, will issue a wide-ranging report on boosting industrial AI adoption before the end of the year, with recommendations for industry and governments. In parallel, the EU will steadily expand the scope of existing regulations, such as the Digital Services Act and Digital Markets Act, to cover cloud and AI services.

The full report analyzes the trajectory of EU AI policy through 2027 across regulation, industrial policy, sovereignty, and competitiveness.
