

# Document: Truckers, green groups team up to demand EU truck dialogue

送信者: POLITICO Pro Alert 受信日時: 2026-09-03 17:30

## 【要点】

- ・国際道路運送連合と環境NGO「Transport & Environment」が、EU委員会委員長フォン・デア・ライエン氏に対し、重型車両の脱炭素化に特化した戦略対話の開催を共同で要求している。
- ・EU内で約700万台の重型車両が運行しており、道路運輸のGHG排出量の約25%を占めているため、最高政治レベルでの注視が必要と主張している。
- ・IRUは充電インフラ整備や手頃な電気料金、融資へのアクセスが整うまで義務的な購入目標に反対する一方、T&Eは拘束力のある国家目標と2027年までの企業向けゼロエミッション義務を支持しており、両者の立場に相違がある。
- ・重型車両の脱炭素化は物流コスト、産業競争力、エネルギー安全保障、およびEUの気候目標達成に影響を与える重要な課題である。

BRUSSELS — The International Road Transport Union and green NGO Transport & Environment are jointly asking European Commission President Ursula von der Leyen to convene her first strategic dialogue dedicated solely to decarbonizing heavy-duty vehicles, according to a letter obtained by POLITICO.

The unlikely alliance of road transport operators and one of Europe's most influential green transport NGOs want an initial meeting in the coming weeks involving hauliers, environmental groups, truckmakers and infrastructure providers, arguing that the sector requires attention at the highest political level.

The Strategic Dialogue on the Future of the European Automotive Industry "has placed political attention on the challenges facing the automotive sector and in particular passenger cars," the groups write, arguing heavy-duty vehicles "face very different operational, economic and infrastructure realities, which calls for a dedicated discussion."

Strategic dialogues are collaborative consultation forums launched by the European Commission to bring together industry leaders, civil society and policymakers to help shape policy.

Around 7 million heavy-duty vehicles operate on EU roads, accounting for close to 25 percent of the bloc's road-transport greenhouse gas emissions. Their green transition will affect logistics costs,

industrial competitiveness and Europe's energy security, as well as its ability to meet climate targets.

The joint request does not mean the two groups have settled their differences. IRU rejects binding purchase targets before operators have adequate charging infrastructure, affordable electricity and access to finance, favoring an incentive-led transition with particular support for smaller hauliers.

T&E backs binding national targets and wants Brussels to propose mandatory zero-emission goals for heavy-duty corporate fleets by 2027 to create demand for clean trucks and charging networks.
