Subject: Notice of New JETRO Regional and Analysis Reports (August 13, 2026 Issue)

Thank you for using JETRO Members Service.

We are pleased to deliver information on newly published regional and analysis reports prepared by JETRO with its unique perspective on the political and economic trends in major countries and regions worldwide. We hope you will find them useful.

### ◆Contents◆

[Special Feature] Maintaining the Free Trade System in an Era of Normalized High Risk  
[https://www.jetro.go.jp/mail5/u/l?p=2E76IbbhNNPnS\\_TAX](https://www.jetro.go.jp/mail5/u/l?p=2E76IbbhNNPnS_TAX)

In a context where various risks, including geopolitical risks, are consistently high, 2026 has seen energy price surges and international logistics disruptions due to deteriorating Middle East conditions. Meanwhile, global trade in 2025 has remained steady, and the rule-based free trade system continues to be maintained. This special feature provides both quantitative and qualitative analysis of the current state of trade, direct investment, and trade policy globally and in individual countries and regions amid rising policy uncertainty. By examining trade and direct investment trends between Japan and the world, as well as among third countries, and by capturing corporate and policy developments in key industries, we explore future directions for Japanese companies' responses.

[Special Feature] Business Cases in Africa <Additional Articles>

Africa is generating diverse business opportunities not only for major corporations with networks and capital, but also for startups with cutting-edge technology and small and medium-sized enterprises in various sectors. Additionally, diverse approaches are possible for each country, including collaboration with third-country and local companies with proven track records. This special feature has showcased concrete African business examples in fiscal years 2024-2025, including activities surrounding the 9th Tokyo International Conference on African Development (TICAD9). In fiscal 2026, with an eye toward the next TICAD10, we will feature a wide range of business cases of Japanese and local companies, primarily through company interviews, exploring new business opportunities, cooperation possibilities, and hints for business development that emerge locally.

[Special Feature] Toward the Quantum Technology Era <Additional Articles>

Deepening Global Innovation

<https://www.jetro.go.jp/mail5/u/l?p=OEEOgykZY8uHSUb4X>

2025 marked a significant milestone—the 100th anniversary of quantum mechanics. UNESCO designated this year as the "International Year of Quantum Science and Technology," with initiatives launched worldwide to promote understanding and awareness of quantum science. In recent years, research, development, and industrialization efforts in quantum technology have advanced significantly. Major countries view quantum technology as an important technology for economic growth and security, with expanding technological competition and domestic and international collaborations among diverse companies and research institutions. This special feature focuses on strategies and innovative initiatives toward social implementation of quantum technology in Japan and worldwide.
