Sector Coverage

US regulatory complacency allows financial risks to build in AI boom

By EG Geoeconomics, Babak Minovi, Jens Larsen, et al.

Limited federal oversight, opaque financing, and uneven local constraints could allow artificial intelligence infrastructure exposures to accumulate across the financial sector, increasing the risk and eventual cost of intervention.

Rising stakes of AI techlash will push hyperscalers toward better stewardship

By EG Sustainability, Julian Strohbecke, Heather West, et al.

The AI industry is facing growing backlash over its environmental impacts, which is translating into regulations and restrictions that are driving hyperscalers to be more resource-efficient
