

EU countries want 'buy European' quotas for green steel

送信者: POLITICO Pro Alert 受信日時: 2026-07-06 20:25

【要点】

- ・ EU諸国は産業加速化法案を修正し、低炭素鋼の調達に「EU製」の義務付けを含めることを提案している。現行案では低炭素鋼に原産地要件がないが、セメントとアルミニウムには既にEU産の最低割合が設定されている。
- ・ 修正案は公共事業で使用する鋼の少なくとも25%が低炭素かつEU産であることを求めており、これはEU産業の競争力強化と産業脱炭素化を目的とした法案の意図に合致している。
- ・ 欧州鉄鋼メーカーや業界団体は数ヶ月間、このような規定の組み込みをブリュッセルにロビイングし、EU製グリーン鋼のリード市場を創出すべきだと主張している。
- ・ 中国は既に産業加速化法案を保護主義的だと批判しており、EU外交官と欧州議員によれば、この法案は欧州連合と世界各国政府間の摩擦点となっている。

EU countries want to amend the proposed Industrial Accelerator Act to include made-in-Europe quotas for low-carbon steel, according to a draft compromise text obtained by POLITICO.

The European Commission's proposal mandates at least 25 percent of steel used in public procurement projects must be "low-carbon," with no requirement for it to be from the EU. By contrast, the proposed legislation already includes EU-origin requirements for other industrial materials, stipulating that 5 percent of cement and 25 percent of aluminum used in public projects must be sourced from within the bloc.

But according to the draft compromise , the Council of the European Union wants to go further, requiring that "at least 25% of the total volume of steel used shall be low-carbon and of Union origin."

European steelmakers and industry groups have for months lobbied Brussels to include such a provision in the IAA, arguing that the legislation — designed to boost European competitiveness while driving industrial decarbonization — should create a lead market for EU-made green steel, as it does for other sectors.

But international grumbles against the IAA have already started. China has previously criticized the IAA as protectionist, and both an EU diplomat and a European lawmaker told POLITICO that the legislation — unveiled in March by Commission Executive Vice-President Stéphane Séjourné — has become a point of friction between the bloc and governments around the world.

Energy and Climate Sustainability Competition and Industrial Policy Trade Mobility
Aluminum cement Competitiveness industrial decarbonization Industry Markets Public procurement
