

Document: Irish presidency seeks 'agreed understanding' on Made in Europe rules

From: POLITICO Pro Alert 2026-07-08 20:43

English Summary

The Irish EU presidency is seeking consensus among member states on contentious aspects of the Industrial Accelerator Act, which aims to boost European manufacturing through "Made in Europe" procurement preferences and local-content requirements. The proposal has divided the bloc, with some countries backing stronger industrial policy while others, including Germany, worry it adds bureaucratic complexity and erects trade barriers that could deter foreign investment.
